Address: Alaskan Al-Kharj road, Riyadh, Saudi Arabia.

Education

Bachelor of Information Technology (IT) 2016/2017 — 2020/2021

Arab Open University (AOU)

- **Achieved a British Bachelor's degree in software development (GPA: 3.75/4).**
- **Achieved a Saudi Bachelor's degree with a specialization in Information Technology (GPA: 3.5/4).**

Graduation project the graduation project is a website called Student Assistant(S-TANT)

I Developed a comprehensive website to aid students in my university:

- Implemented a Chat-Bot for automated responses to student requests.
- Created a secure, cross-device accessible website.
- Established a resource library for online or local access to course materials.
- Provided efficient academic advising and external course references.)

Work experience

SPI, October 2020 – Present:

- manage of SPI company's network and servers, overseeing the entire IT infrastructure.
- Configured and maintained IP phone system, with a Sangoma server, ensuring seamless communication within the organization and outbound and inbound calls.
- implement domain network, including the installation and configuration of surveillance cameras for enhanced security measures.
- Implemented and configured Kaspersky Security Centre to enhance endpoint security, monitor threats, and ensure a robust defence against cyber threats.
- Installed and configured Fortinet firewall to establish a secure network.

- Lead the installation and configuration of 3D printers, providing comprehensive training to the team on their usage. Assume responsibility for the ongoing maintenance and support of 3D printers.
- Troubleshoot and resolved software issues, printers connectivity problems, and programs installations.
- Implemented effective data backup and recovery strategies to safeguard critical company information.
- Engaging with our systems and machine suppliers to establish robust support connections and ensure effective assistance.
- Conducted regular system audits to identify potential vulnerabilities and implemented security measures accordingly.

SPI | April 2020

- Operated and maintained a 2D printing machine, ensuring efficient, high-quality production.
- Managed day-to-day operations, overseeing the printing process and troubleshooting technical issues collaboratively.

Individually projects

- 1- developed a website for learn system university
- 2- developed a website for an Aluminium Company
- 3- developed a website for a café shop.
- 4- designed and built robotic arm using Arduino Uno
- 5- designed and built a small CNC machine using Arduino nano and CNC shield

Qualifications

1. Studied Information Technology.
2. Good in development platforms: Python, HTML, CSS, JavaScript, Bootstrap, and React
3. Good in Arduino Development and Mechatronics, demonstrated through the creation of a robotic arm and CNC machine
4. Good in 3D designing using Onshape and 3D printing.
5. Speak in Arabic and English..
6. Proficient in Microsoft Office applications, including Word, Excel, and PowerPoint.

Objective

I am a highly motivated individual seeking to gain further experience in various fields, including:

- Website development
- Mobile application development
- Mechatronics & 3D Designing
- Artificial Intelligence
- Digital Marketing

Interests :

- Passionate about technology.
- Enthusiastic about programming.
- Keen on digital marketing.
- Interested in Artificial Intelligence.²
